# ASSESSMENT 1

Task: Create the following design with HTML and CSS.

Build Specifications:
- Do not worry about trying to match the exact spacing of the elements.
- A **form** element is used and contains:
  - An **h2** that displays "**Sign In**"
  - Two **inputs** with corresponding **labels**
    - The first input has a placeholder of "**Enter your email here**"
    - The second input has a placeholder of "**Enter your password here**"
  - A button
  - An **anchor** that displays "**Recover your password**".
- The form and the button have rounded corners.
- The **background-color** of the body should be **teal**.

- The button should be **black** with **white** text
- The form must be **centered horizontally** on the page.
- **Inputs** should not have a top, right, or left **border**.
- The anchor should have a color of **#CCC** and not be underlined.

TESTS

Overview: This challenge contains 10 tests. The tests are used to check the accuracy of your assessment. Below you will find a description of each test.

Test Cases:
1. Must include a form.
2. The form must be centered horizontally on the page.
3. The form must contain an h2, two labels, two inputs, a button, and an anchor.
4. The labels are properly structured to be associated with the correct inputs.
5. The input placeholders are correct.
6. Inputs should not have top, right, or left borders.
7. The body has a background color of teal
8. The button must have a background color of black and the button text must be white.
9. The anchor should have the following color: #CCC and not be underlined.
10. The form and the button have rounded corners.
